Art competition, please vote for your favourite: http://ichep2020.org/beinspired-vystava-hlasovani.htm
Interdisciplinary engagement is very powerful to enlarge effort outside our community and especially allow students to get deeply involved in the topics with their own mean.

To maximise sustainable IMPACT with our recourses -> engage and collaborate with creative and education institutions

Interdisciplinary collaborations allow to offer a larger variety of ‘languages’ students and general public may understand and relate to.
Summary

Students need to understand
Science is a Creative profession
and the Arts a serious debate on topics.

Thanks for your attention!
